BCY 1/8 POUND SPOOLS OF BOWSTRING MATERIAL

In order to provide the highest level of customer service, dealers and stringmakers need to stock all 25 colors of BCY bowstring material, no matter how fast or slow various colors sell. Now, they can keep a full color range available more economically with BCY's new 1/8 pound spools. Each spool makes three to four sets of strings and cables or up to eight strings while reducing stocking costs by nearly 50 percent. Available in 452X, 8125 and DynaFLIGHT 97 bowstring material. For more information, Circle #126, log onto bcyfibers.com or call (860) 632-7115.

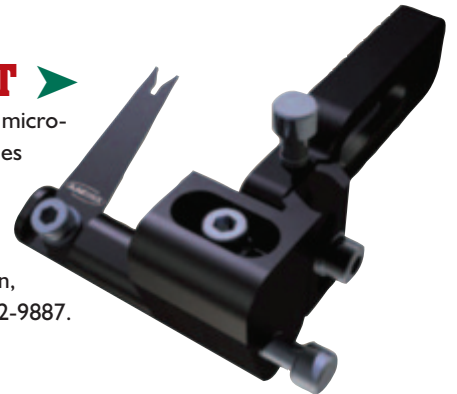

EXTREME OUTDOOR PRODUCTS ELIMINATOR PRO

Extreme Outdoor Products offers a new bow sight that is not only rugged but also provides the next level of archery accuracy and versatility. The Eliminator Pro utilizes rear-sight technology along with a combination of front-sight designs that will provide the archer with big advantages. This sighting system differs from other rear-sight systems through technological advancements that bring archers to the same anchor point every time. The Eliminator Pro eliminates torque and provides for a precise aiming point. This durable bow sight is constructed of lightweight 6061 aircraft aluminum and sturdy fiber optics. It is offered in Realtree, Mossy Oak and Lost Camo patterns, as well as a black anodized model. The sight is predrilled and tapped for lighting packages. The Eliminator Pro is available in a horizontal-pin package or a 3-, 4- or 5-dot vertical-pin package. For more information, Circle #131, log onto extremeop.com or call (601) 833-5395.

AAE/CAVALIER PRO BLADE REST

Developed with the help of AAE's staff shooters, the Pro Blade Rest is the toughest micro-adjustable target rest on the market today. It features AAE's own design in launcher blades with a unique indexing system for changing out the launcher without having to readjust the tune. Laser-etched adjustment lines and oversized lock-down machine screws complete this rest. The Pro Blade Rest comes standard with .010-inch and .012-inch blades to help the elite target shooter create the perfect tune. For more information, Circle #186, log onto arizonaarchery.com or call (928) 772-9887.

BUCKEYE CAM APOLLO

The BuckEye Cam Apollo is a high-quality camera designed to withstand the harshest environments. The Apollo's pictures and videos are stored on a standard SD card instead of transmitted to a base unit. In addition, the Apollo is upgradeable to a long-range wireless camera system. With the ability to take 2 pictures in .2 seconds, the Apollo ensures you won't miss a thing. The Apollo features selectable resolution settings, infrared photos at night with an invisible flash, two video modes, time-lapse photography and extremely low power consumption so the user can go several months to a year between charges. For more information, Circle #154, log onto buckeyecam.com or call (866) 325-8172.

CARTER SENSATION ➤

Many shooters enjoy practicing with Carter Enterprises' tension-activated Evolution release but prefer to compete with a trigger release. Carter's new-for-2008 Sensation release allows them to do exactly that. The Sensation is a thumb-activated trigger release that is based on the bestselling Evolution series, which means shooters will have the same impact point as with any Evolution model without having to adjust their peep or anchor point. This new open-hook design is perfect for fast and quiet cocking and loading to the

string. The Sensation also incorporates the revolutionary Interchangeable Tension System (I.T.S.)

for micro adjustment of trigger pressure to suit shooter preference. For more information,

Circle #153, log onto carterenterprises.com or call (208) 624-3467.

◀ OLD FAITHFUL HUNTING PRODUCTS BUCKMISTER

The BuckMister is a self-contained, fully programmable scent-dispersal system that eliminates the need for hunters to visit the hunting area repeatedly to leave scent. This remarkable system allows the hunter to program the exact date, time, duration and increment at which scent will be dispersed. Enclosed in a sturdy, discreet plastic housing, the BuckMister is designed to stay in the woods for long periods of time and can be programmed up to six months in advance. The BuckMister's mess-free aerosol cans mist just the right amount of fresh scent into the air, so there's no waste. Lightweight and easily transportable, the BuckMister features high-quality BuckBomb scents for a combination deer won't be able to resist. For more information, Circle #144, log onto thebuckmister.com or call (850) 258-3034.

MAGNUM GRIP ARROW PULLER ➤

Pulling arrows from targets has always been a thorn in every archer's side...until now. With its all-aluminum construction, stainless-steel hardware and resilient rubber inserts, the one-size-fits-all Magnum Grip Arrow Puller from Double D's Archery Products solves the problem of hard-to-pull arrows. A straight ergonomic pull reduces shoulder fatigue, and the Magnum Grip's magnified gripping strength does not require a strong grip to work. No more dipping or soaping arrows. Not even tight groups are a problem for the Magnum Grip. Unlike other arrow pullers, the harder you pull the Magnum Grip, the tighter it clinches the arrow. The grip tubes spread out over the arrow's surface, giving the Magnum Grip excellent gripping ability without the risk of crushing the arrow. The Magnum Grip Arrow Puller is a must for every

archer. For more information, Circle #176, log onto ddarchery.com or call (610) 838-1121.

◀ BAD RIVER OUTDOORS QUICK RANGE

The Quick Range is a hands-free rangefinder that allows bowhunters to range game at full draw. Because the simple but ingenious Quick Range attaches to the bow sight with adhesive, the bowhunter does not need to shift even an inch to range a target, eliminating game-spooking movement. Accuracy is not affected by obstacles between the bowhunter and the target. Custom versions can be ordered for rectangular and small radius sights. The Quick Range is available for elk, caribou, antelope and mule deer/whitetail deer. For more information, Circle #172, log onto badriveroutdoors.com or call (989) 585-3234.

New&Notable

D.R. OUTDOORS WIND-TEL

Bowhunters know how critical it is to stay downwind of the animals they hunt, but it can sometimes be difficult to tell exactly which way the wind is blowing. Wind-Tel from D.R. Outdoors Inc. solves that problem. Wind-Tel, the finest and lightest talc available to hunters, is environmentally friendly and scent free. Even the slightest breeze will carry Wind-Tel, so hunters will always know in what direction their scent is being carried. Wind-Tel can also be used to make scents more effective and in selecting treestand locations. Packaged in a pocket-size dispensable squeeze bottle, Wind-Tel is a must have for any bowhunter. For more information, Circle #181, log onto droutdoors.com or call (516) 203-7290.

TINK'S POWER SCRAPE MOCK SCRAPE STARTER

Tink's Power Scrape Mock Scrape Starter conditions deer to return to a stand location over and over again. This revolutionary synthetic buck lure works with a buck's natural curiosity during the early season and with his drive for territorial dominance during the rut. Power Scrape can be applied to natural or mock scrapes on old logging trails, on deer trails or along the edges of fields. Start a scrape two weeks before the season, and deer will start visiting the site by opening day...and keep coming back throughout the season. For more information, Circle #218, log onto tinks69.com or call (800) 624-5988.

SWIVEL SAFE

The Swivel Safe Security Enclosure protects scouting cameras in the field from both animal and human predators. Available in over 20 models, there's a Swivel Safe for almost every scouting camera. The enclosures are made of 1/8-inch steel, providing superior security for cameras and images. The Swivel Safe allows for easy adjustment and incorporates a swivel to allow for the perfect angle on even the most crooked tree. The Swivel Safe Security Enclosure has been beaten, driven over and even struck by lightning. This is one tough security system. For more information, Circle #123, log onto swivelsafe.com or call (402) 432-4950.

EXTREME ARCHERY PRODUCTS TS HUNTER

Treestand hunters love the simplicity of single-pin sights. New for 2008 is the Extreme Archery Products 750 TS Hunter sight. This single-pin hunting sight features one upright steel pin with extended-length fiber optic in .019 or .029 size, a quick-adjust thumb knob for tool-less elevation adjustments and a fluorescent center ring for low-light shooting. An optional Purple Haze light with rheostat adjustment makes low-light shooting even more of a snap. Available in Mathews Lost Camo, Realtree Hardwoods Green HD, Realtree AP and Realtree APG camo patterns. For more information, Circle #210, log onto extremearchery.com or call (606) 928-9447.
